Discussion/Quiz questions to accompany Bradley et al., 2010

1. Why are invasive species likely to be better suited to change than native species?

2. Are rising temperatures and altered precipitation likely to favor invasives? Why or why not?

3. How do global changes create resources opportunities? Give an example

4. Do you think resource opportunities from global change are likely to be evenly or unevenly distributed globally? Explain why.

5. Explain the strengths and weaknesses of modeling invasion risk based on the invaded vs. native vs. global range.
