

## **Assignment 10, the last one for the semester**

1. Provide trees for the following sentences. For the ungrammatical sentences, your trees and accompanying text should provide an explanation for the ungrammaticality. Case and  $\theta$ -role assignment should also be shown. You don't need to say what  $\theta$ -role is being assigned - just show what assigns a  $\theta$ -role to what. Your trees should subscribe to X-bar theory to the extent possible.

- (1) a. John ate pizza.
- b. \*John ate not pizza.
- c. John did not eat pizza.
- d. John is eating pizza.
- e. John is not eating pizza.
- f. \*John not is eating pizza.
- g. \*John did not be eating pizza.
