

Northeast Computational Phonology Circle (NECPHON)

Department of Linguistics, University of Massachusetts, Amherst
November 10, 2007

- 12:00 OT and its relatives: overview of grammar models
Joe Pater, UMass
- 12:20 Output-Driven Maps
Bruce Tesar, Rutgers
- 1:00 Prudent error-driven learning with OT-CC
Michael Becker, UMass
- 1:30 Deriving phonological acquisition stages: the roles of markedness and frequency
Gaja Jarosz, Yale
- 2:10 Modeling lags of doubly marked structures with additive constraint interaction
Adam Albright, Giorgio Magri and Jennifer Michaels, MIT
- 2:45 - 3:15 Break
- 3:15 Learning Maximum Entropy Models
Mark Johnson, Brown
- 3:55 Restrictiveness in gradual learning of Harmonic Grammar
Karen Jesney, UMass (joint work with Anne-Michelle Tessier)
- 4:25 The subset problem in additive OT
Giorgio Magri, MIT
- 5:00 A Bayesian account of the perceptual magnet effect
Naomi Feldman, Brown (joint work with Tom Griffiths)
- 5:35 Next NECPHON? Dinner?
