UMass Amherst Field School at Akko, Israel
Archaeology, Conservation, and Heritage Studies on the Mediterranean Coast

Field School Dates: July 3 – July 30, 2016

Anthropology 498F: Archaeology, Survey, and Conservation (6 credits) introduces students to the basics of archaeological excavation and survey methods; will give a general overview of the history and material culture of ancient Israel and the eastern Mediterranean; and will include an introductory course to Geographical Information Systems (GIS). The students will participate in daily excavation on the tell, afternoon labs and pottery processing, and lectures.

OR

Anthropology 596G: Advanced Field Archaeology (6 credits) offers further training in excavation methods, field recording, and post-excavation analysis for students who have already completed an archaeological field school.

All participants in the excavation will live in a dormitory at the Israel Nautical Academy in Akko, just a few blocks from the gate of the Old City of Acre. The project will supply room, meals, and transportation for field trips.

APPLICATION DEADLINE: March 1, 2016
