

The Student Alliance for Israel

Helping Students Believe in Israel

The Student Alliance for Israel is the premier registered student organization at the University of Massachusetts committed to promoting the belief in and the expression of pro-Israel views on campus.

We provide a great deal of programming for students at the University including cultural events, response to controversial political issues, and enrichment activities that engage students in being Israel-minded individuals throughout their daily lives.

The response to SAFI programs has been significant:

- Going strong in our fourth year of committed pro-Israel activism at the University.*
- Hundreds of members, including university students, faculty and residents from Amherst and the surrounding towns.*
- Numerous popular events each semester, attended by many enthusiastic students who share in their support for the State of Israel.*
- Newly acquired status as an official Registered Student Organization of the University.*

From Humble Roots

Founded as a student group of the University of Massachusetts Hillel in 2000, the Student Alliance for Israel was designed to combat growing anti-Israel sentiment. From its seeds as a small group of committed students who met at the Hillel to work for a cause they knew needed increased representation, SAFI today has become an icon of Israel solidarity.

Students know where to turn, and supporting the state of Israel as a University student has grown in popularity and strength because of SAFI's hard work and tireless efforts.
