SOME CRYPTS TO TRY

Please try to solve the following crypts. We will go over them in class in order to determine the **method** of decryption. The method will help us to understand the problems faced by code breakers in WW2. As always, browse the internet, do some reading—class is not the place to learn, it is the place to discuss what you have learned.

[Gaines, #107, Vigenère] *Numbers are always possible.*
